PROFESSIONAL SUMMARY

Full-stack and mobile developer with hands-on experience building and upgrading public-sector digital platforms. Strong problem-solver with a practical, self-directed approach: given a problem, I can investigate it, learn what is needed, identify the root cause, and deliver a working solution with minimal supervision. Strong English communication and emotional intelligence, with experience taking projects from requirements through development, testing, and deployment.

CORE SKILLS

Languages & Web Development	HTML, CSS, JavaScript, PHP, Python
Systems	Mobile App Development, API Development, Backend Development, UI/UX
Integrations	Databases, Dashboards, Admin Portals, Authentication, Role-Based Access
Professional	Paystack, Firebase Cloud Messaging
	Problem Solving, Independent Execution, English Communication, Emotional Intelligence

EXPERIENCE

2TOC Solutions Ltd

Sole Developer / Full-Stack Technical Lead

2025 – Present | Abuja, Nigeria

- Promoted from mobile app development into a Sole Developer / Full-Stack Technical Lead role, taking broader ownership of product development and technical delivery.
- Rebuilt and upgraded core technology platforms across security, emergency response, fire safety, and national data management.
- Designed and maintained dashboards, mobile apps, admin portals, APIs, databases, and backend systems for N-Alerts, BOOSTAR, BOOSTAR-M, NFEC, and NFDRC.
- Built emergency-response features including panic alerts, travel safety status, location sharing, user reporting, and response-contact integration.
- Developed NFEC systems for fire-extinguisher registration, QR/code verification, vendor records, compliance tracking, inspections, and administration.
- Built NFDRC modules for national fire data collection, repository management, analytics, reporting, and department coordination.
- Integrated authentication, role-based access, payment processing, push notifications, searchable records, data-capture forms, and administrative dashboards.
- Handled end-to-end development across UI/UX, backend logic, database design, API development, testing, debugging, deployment support, and continuous upgrades.

2TOC Solutions Ltd

Mobile App Developer

2020 – 2024 | N-Alerts Project

- Developed and maintained the mobile application for the N-Alerts security and emergency reporting platform.
- Built mobile workflows for registration, emergency alert reporting, location-based response support, and community security communication.
- Developed the NCPWD mobile app around 2021 for disability-related registration, user data capture, certificate requests, and public service access.
- Handled mobile app updates, testing, feature improvements, and conversion of field and administrative requirements into usable app functions.

SELECTED ACHIEVEMENT

- Promoted from Mobile App Developer to Sole Developer / Full-Stack Technical Lead, reflecting expanded technical ownership and responsibility.
- Trusted with end-to-end development and upgrades across multiple real-world public-sector digital platforms.
